Abstract (en)
[origin: EP1688549A2] A floor drain (2) with a drain bowl (4) with a preferably cylindric outer side (6) and a lower central drain connection which is adapted for connecting to either a straight drain pipe or to an angular drain pipe (10), the floor drain (2) including a mounting flange (12) with a central connecting opening (16) which by means of packing means (18) is adapted to be mounted tightly externally of the cylindric outer side (6) of the drain bowl (4). In a simple way is hereby achieved a floor drain with a drain bowl with associated mounting flange which may easily be adapted to the height of an existing as well as a newly established building membrane, as the flange for mounting to the membrane may be displaced vertically and externally of the drain bowl.
