Abstract (en)

[origin: EP1688696A1] The adjustable recoil has a base plate (1) which is adjustably fixed to a stock part (3) of a gun. A bottom plate (19) is adjustably mounted on the base plate and one end part is fixed to the base plate. The bottom plate is arranged so as to be able to swivel around a transverse axis on a connecting piece, which is guided in a moveable manner via guide elements (13,15) on the base plate and fixed in a desired position by a retaining screw (18). The bottom plate contains a setscrew (29) arranged above the transverse axis (20) and compressed between the base plate and the connecting piece.
