Abstract (en)
[origin: WO2005055262A1] The invention relates to a switch module comprising a selector lever that is pivotally mounted in a housing and comprises a sleeve-type selector part guide, into which a detent pin is introduced, one free end of which is supported on a sliding block. The selector part guide comprises at least one finger-type projection that lies on the detent pin and radially exerts a force in the direction of the latter.
