Abstract (en)

[origin: WO2005055341A1] A bracket for a fuel cell system having at least one fuel cell stack and a number of peripheral devices is disclosed. The bracket includes first and second spaced apart side frames joined to each other by one or more end frames. The first side frame and the second side frame surround a portion of one or more fuel cell stacks. The fuel cell stack is removably mounted between the first and second side frames, and the peripheral devices are removably mounted to an outside face of the side frames. A fuel cell system is also disclosed. The fuel cell system includes one or more fuel cell stacks and one or more peripheral devices. The fuel cell stacks and the peripheral devices are removably mounted to a bracket, as described above.
