Abstract (en)

The lost shuttering element (1) is used with a shuttering structure (3) having a shuttering plate (4) on the ground side and a standardized side shuttering element (5), variably positioned along the shuttering plate in dependence on the size of the required pre-cast concrete component (2). The lost shuttering element lies on the inside of the side shuttering element, a fixing (8), e.g. a hot-melt adhesive, used for fixing it within the shuttering structure.
