Abstract (en)
The invention relates to a packaging block (1), comprising a plurality of superposed packaging modules (2). A packaging module (2) comprises two superposed film parts (4a,4b) which are attached to each other at two substantially opposite side edges (3a,3b) via sealed seams to form a packaging sleeve (4) for packaging plant and/or flower products. Further, the packaging module comprises an attachment strip (6) connected via a separation line (5) with an attachment side (9) of the packaging sleeve, for mutually attaching the packaging modules. The packaging modules are also mutually attached to each other via a point of support (10a,10b) that is situated on the attachment side (9) of the packaging sleeve (4) near the separation line (5).
