Abstract (en)

The cover has a body (4) with a tub shaped admission in which a loading component (10) is arranged, where the component has a natural stone. The component is arranged and formed at the body in such a manner that the surface of the component aligns with a contact surface. The body is provided with a rim with which the body is rest on a ring shaped supporting surface and with ventilation openings. An independent claim is also included for a drainage mechanism and/or a manhole construction with a cover.
