Abstract (en)
[origin: EP1691014A2] A sliding panel (1) which is releasably connected at its top or upper edge and/or at its bottom or lower edge to a carrier (19) that supports the pane. The means for releasably connecting the panel and the carrier comprises a magnet (21,121,221) and a ferrous member (23, 123, 323) which is attracted to, and can be magnetically attached to, the magnet. The magnet is on one of either the carrier or the panel and the ferrous member is on the other of the carrier or panel.
