Abstract (en)

[origin: EP1691023A2] Frame assembly (4) has pane/leaf (5), door/window frame (6), ventilation passage between inner (3) and outer (2) parts, air flow restricting device (1) in ventilation channel, with restricting part (17) which can change between an open position, opening ventilation passage and a closed position, closing it. This part stays open as long the air flow speed is below a limiting value, as monitored by a part (14) situated in the ventilation passage forming an inner end part for the ventilation passage.
