Abstract (en)
A method for displaying display information (DI) via a start up screen (StS) and/or via a shut down screen (ShS) of a display means (DM) of a customer device (CD) is provided wherein a step of providing primary information data (PID) is realized by said customer device (CD) by passively receiving said primary information data (PID) from an external data source (DS) outside said customer device (CD) and wherein a step (B) of generating secondary information data (SID) which is representative for the display information (DI) to be displayed is realized in said or internal of said customer device (CD) in an active manner.
