Abstract (en)
[origin: WO2005058500A1] A microfluidic separation system (1) for separating fluid sample medium from cells provided in a sample, for example, a sample of bodily fluid which is to be subjected to further analysis. The system may include a microfluidic structure (2) and a cell aggregation agent. The microfluidic structure may include one or more microfluidic channels (3, 4, 5) operable to separate aggregated cells from fluid sample medium by size exclusion.
