Abstract (en)

[origin: CA2547277A1] The invention relates to a method for producing a decorative laminate consisting in preparing a decorative layer (5), applying a mixture (110) of a thermohardening synthetic resin and hard particles (210) to said layer, pressing the decorative layer and the mixture in a hot press at a press temperature in order to obtain a laminate, the mixture also containing a wax whose melting point is less than a temperature of approximately 140 ~C and/or more than approximately 50 ~C lower than the press temperature. A decorative laminate, a decorative laminate panel and a method for producing a decorative prepreg sheet are also disclosed.
