Abstract (en)  
[origin: WO2005061806A1] The invention relates to an installation device (1; 101) suitable for various sanitary appliances, especially concealed combination fittings. Said device comprises a housing (10; 110) that can be arranged in an opening of the wall of a building, and can contain a connection device pertaining to a sanitary appliance and comprising at least two connection openings. The connection openings of the connection device of the sanitary appliance are connected to the water-carrying domestic pipes by connection means (40; 140) of the installation device (1; 101). At least one connection means (40; 140) is separate from the housing (10; 110) and can optionally be introduced into the housing (10; 110) of the installation device (1; 101).
