Abstract (en)

[origin: WO2005057201A1] The invention relates to a pH measuring probe and to a method for producing the same. Said probe comprises a pH electrode (203), a reference electrode (204) and a housing (212, 220) surrounding said electrodes that has a housing sealing body (212), through which respective connecting elements of the pH electrode and the reference electrode pass. The housing sealing body (212) is a cast part, into which the connecting elements of the pH electrode (203) and the reference electrode (204), in addition to optional connecting elements (201, 202) of a temperature sensor (218) are cast.
