Abstract (en)

[origin: EP1692978A1] A refrigerated display case (10) for maintaining food product at a desired temperature. The refrigerated display case includes a case (12), a refrigeration system, a support assembly (32), and a glass pane (18). The case at least partially defines a product display area (14) for supporting and displaying the food product. The refrigeration system supplies refrigerated air to the product display area. The support assembly (32) includes a plurality of support brackets (34), a decorative assembly (36), and a glass support assembly (38). The brackets (34) are coupled to a front portion of the case (12) and each is separated from an adjacent support bracket by a distance (D). The decorative assembly (36) is coupled to portions of the adjacent support brackets (34) and the glass support assembly (38) is coupled to other portions of the adjacent support brackets (34). The glass pane (18) at least partially defines the product display area (14) and includes a lower edge (74) supported by the glass support assembly (38).
