Abstract (en)

[origin: EP1692981A1] The unit (6) is designed as a rectangular sheet (60) covering several specifically shaped profiles (1) with slots (602) and plane areas formed at the front (600). The slots (602) provide access for holding elements (70) carrying hooks, boards (8, 81), and other display elements (7, 71, 72, 75, 78, 79) of various shapes. The inserted elements (70) can be held in two differently shaped upper grooves and a lower groove provided with an anti-slip insert depending on their shape and position. A version with slots (602) on both outer surfaces (600, 601) of the panel (60) can also be created.
