Abstract (en)
An articulated sanitary stretcher for multipositional decubitus (prone/supine) therapeutic treatments comprising a horizontally extended platform made up of a fixed central board for supporting the trunk of the body of the patient and an optional articulated back support of respective extensions at each end, made up of different support parts for the upper and lower limbs of the patient which are articulated with respect to said fixed board and articulated to one another in order to adjust the position of said limbs in their very diverse anatomical angular positions.
