Abstract (en)

[origin: EP1693163A2] The handle has a magazine (M) attached in a cavity of the handle for receiving several screwdriver inserts (4). The magazine consists of a sleeve (5) provided with a retaining device for the inserts, and a core (9) provided with a stop unit. The core comes out when the sleeve stops and is displaced relative to the handle, with a cap (3) detached from the handle, such that the inserts kept at the sleeve can be projected from the cavity.
