Abstract (en)

An apparatus for shrink wrapping a plurality of individually wrapped containers comprises a stacking station (100) for superimposing a pair of containers (10, 11) individually wrapped in a heat shrinkable film, a shrink tunnel (200), and a transfer device (120) for transferring a pair of superimposed containers (10, 11) from the stacking station (100) to the shrink tunnel (200). The transfer device (120) is adapted to engage and separate the pair of superimposed containers (10, 11) and to convey the pair of separated superimposed containers from the stacking station (100) into the shrink tunnel (200).
