Abstract (en)

The tray has two lateral walls and internal proximal and distal walls forming an article receiving a space, where the lateral walls extend above a roll line via blocking flaps. The blocking flaps have guiding panels with tabs cooperating with rectangular flaps (22b) and distal guiding flaps (23b) to form, with panels, an external apron around a central bottom part (21). The apron and the walls form a space to receive a wall of the base. An independent claim is also included for a method for forming a display rack.
