Abstract (en)

The packing (10) has a frangible membrane (18) delimiting, inside a case (12), the lower and upper housings (20, 22) respectively filled with two substances e.g. pudding. The membrane has a depression line (40) extending on a width of the membrane and following a curved profile to limit a tongue (42). The membrane has a support layer associated to a sealing layer that is constituted of fifty percentage of crystalline phase.
