Abstract (en)

[origin: EP1693325A2] The printer unit (02) prints a web (03) with six axially adjacent printed pages and has a superstructure (04) in which the web is divided longitudinally into three part-webs (03a,03b,03c). A folder structure has at least one roller for conveying the part-webs and at least one folder device each driven mechanically separately by drive motors. At least two printing towers (01) each have at least two printer units and a folder structure which has two vertically staggered groups of at least two formers each and at least one group of leading rollers.
