Abstract (en)

[origin: EP1693519A1] A divider has support plates (11) connected to the lower edges (10) of the inclined collision plates (6). A guide bar (15) extending above the base is connected to the base through the vertical posts (16). The support plates of adjacent dividers are detachably connected to each other by fishplates (35). The fish plate has receiving openings at ends for engaging a pin which is set in the underside of the support plates.
