Abstract (en)
The device has a mobile, central dehumidification unit (1), which is arranged within outer area of a building (2). Two air dryer (5) and two air hoses (6) are attachable at a drying air distributor (4) for dried air. The dried air is distributed with an air distributing unit over an accumulative cable (10). The hoses guide from the dehumidification unit into the building. The distributor is arranged at or in the dehumidification unit.
