Abstract (en)

[origin: EP1693933A1] The part (1) has a connection contact unit held by a connection housing, where each unit has an insulation displacement contact or a piercing contact for contacting electrical conductor. Each insulation displacement/piercing contact is electrically connectable to corresponding contacts of a corresponding counter piece. The housing has two housing parts which has the unit introduced from interior of the housing. An independent claim is also included for a method for manufacturing a plug-and-socket connection part of a plug-and-socket connection for data communication.
