Abstract (en)
[origin: WO2005058092A1] The invention relates to a displaceable piece of furniture comprising at least one force sensor which is used to measure forces applied to the external panel of the displaceable piece of furniture. The displaceable piece of furniture (1) comprises, when seen from the side, an internal panel (3) which is arranged behind said external panel (2) at a distance therefrom. The at least one force sensor (4) is disposed between the external panel (2) and the internal panel (3).
