Abstract (en)

[origin: WO2005051138A1] A clip (1) for holding shelf accessories (3) on a shelf (2), which shelf has a number of through openings (12) that are made in the surface of the shelf (8) and arranged one after the other along the front edge of the surface of the shelf and in the vicinity of the front edge, which clip is elastic and comprises an upper part that is arranged to be placed above the surface of the shelf when in the mounted position, and two lower legs that are arranged to be inserted through openings in the shelf and to interact with the underside of the shelf in a mounted position in order to hold a part (5) of a shelf accessory flexibly between the surface of the shelf and the upper part of the clip. The legs and loop of the clip are designed to achieve an elastic fixing of the accessory to the shelf.
