Abstract (en)

[origin: WO2005058654A1] The invention relates to an airbag device for a motor vehicle, comprising an inflatable gas bag, a gas generator for inflating said gas bag; a valve for letting gas out of the gas bag; a moveable actuating element for said valve, which can be actuated in order to open the valve; and a trigger mechanism which is used to actuate the actuating element by producing pressure. According to the invention, the trigger mechanism (9) releases a compressed gas in order to actuate the actuating element (7), said gas directly acting upon a pressure attack surface (77b) of the actuating element (7).
