Abstract (en)

[origin: GB2409195A] A detrainment device for a rail vehicle comprising an emergency exit door (8) integrated into a front of the rail vehicle and a movable ramp (16) for bridging a coupler (26) of the rail vehicle, wherein the ramp (16) being associated with the emergency exit door (8) and being movable from a storage position into an operational position. The ramp (16) is located in its operational position completely above the coupler (26) of the rail vehicle. Moreover, the ramp (16) is provided with a foldable or telescopic ladder (21). The detrainment device allows both a train-to-train and a train-to-track detrainment.
