Abstract (en)
[origin: WO2005056421A1] A product package and method for product packaging including an internal product container (14) having an external mating surface (118,326) and an external sleeve (12) configured to substantially enclose the product container (14) and having an opposing internal mating surface (112,347) and in which the package is assembled by sliding the product container (14) into the external sleeve (12) until the external mating surface (118,326) on the product container 14 and the internal mating surface (112,347) on the sleeve (12) matingly engage to lock the product container (14) in place within the external sleeve (12) to prevent pilferage of and tampering with the product.
