Abstract (en)  
[origin: WO2005028389A2] It is described a microfibrinous composition, particularly used for heat and sound insulation, which comprises an amount of siliceous spicules of spongiaria ranging from 70% to 99% by weight, based on the total way of the composition. Further, it is described the processes and equipment deigned to obtain said microfibrinous composition.
