Abstract (en)

[origin: FR2864286A1] The module has an anti-intrusion device delimiting a secured zone and configured for detecting physical intrusion in the zone. A ROM (6) is stored with secured software component of an electronic transaction application. A CPU (2) arranged in the zone and connected to the memory is designed to execute the component. A communication interface (4) connects the CPU to an external processing unit for exchanging data with the CPU.
