Abstract (en)  
A dosing system includes an application roller that cooperates with chamber blades (20) or a dosing roller. A form cylinder with a cleaning mechanism is held by a coating central container (23) over coating central lines (24) in the direction of the chamber blades or dosing roller. The cleaning mechanism enables automatic cleaning of the chamber blades or dosing roller and the coating central lines between the coating central container and the chamber blades or dosing roller.
