Abstract (en)

[origin: WO03074361A1] The invention relates to a production and packing unit line, comprising a controller (33) and production units each of which comprises adjustable bodies, such as, in particular, a (cigarette) production machine (maker 10), a packing machine (packer 11), optionally a film wrapping machine (12), optionally a box packer (case packer 13) and optionally a carton packer (cartoning unit 14) for the production and particularly delivery-ready packaging of firstly products - cigarettes and cigarette packets of a first type and then products of a second type, each made from starting materials such as paper cuts, film or similar, the controller itself and a method for control of the line. At least one set of parameters (61), associated with products of the first type and a second set of parameters (62), associated with products of the second type are stored in a memory in the controller (33), such as to be selectable and, on selection of a parameter set (61, 62), a set parameter for adjustment of the or each adjustable body may be transmitted to the or each production unit by the controller (33).
