Abstract (en)

This is a new system of profiles for jointing flooring elements, consisting of a base profile (B) resting on, and attached to the subfloor, a U-shaped main spacer (D1) and a top profile (T). Said base profile (B) and main spacer (D1) are respectively complete with ribbing (Br) and a seat (D1s), both of substantially circular cross-section, so that the main spacer (D1) can be positioned at a variable tilting angle. The new system of profiles also includes an auxiliary spacer (D2) with a rectangular cross-section, which can be inserted between the base profile (B) and the main spacer (D1) to increase the distance between the top profile (T) and said base profile (B). Said auxiliary spacer also includes a seat (D2s) in the bottom and ribbing (D2r) in the top, both of substantially circular cross-section.
