Abstract (en)  
The present invention relates to an igniter assembly (10) including an igniter main body (20) accommodated in an igniter collar (11), the igniter main body (20) fixed within the igniter collar (11) by a resin (30), the igniter collar (11) having at least a cylindrical wall (12) and an annular protruding portion (13) protruding inward from a part of the cylindrical wall (12), the resin (30) charged so as to extend from a position sandwiching the annular protruding portion (13) from the upper and lower directions up to the same height as an upper end (14) of the cylindrical wall (12), but not to cover an outer peripheral wall of the cylindrical wall (12).
