Abstract (en)

[origin: WO2005063199A1] The invention relates to an effervescent preparation containing an effervescent batch, at least one basic medicinal substance, and one or several optional agents. Said effervescent preparation is characterized in that alkalization of the urine, and hence increased accumulation of the basic medicinal substance, is prevented. Also disclosed are medicaments containing said effervescent preparation, methods for the production thereof, and the use thereof.
