Abstract (en)

[origin: WO2005062322A1] The invention relates to an electric machine tool comprising an electric power supply unit (32, 132, 232) which is removable on the tool side and provided with an at least indirectly actuatable switch (14, 114, 214) for switching on and off a driving engine. The inventive machine tool is characterised in that it is provided with an decoupling device (58, 158, 258) for decoupling the switch (14, 114, 214) and a switching unit (26, 126, 226) actuating at least indirectly said switch (14, 114, 214).
