Abstract (en)

[origin: WO2005062328A1] The invention relates to a medium voltage switchgear assembly which comprises at least one disconnecter and whose drive unit is disposed inside or outside a gas chamber according to the generic part of claim 1. In order to further develop a switchgear assembly of the generic type so as to render the same more compact and more functional, the disconnecter is embodied as a three-position vacuum chamber switch.
