Abstract (en)
[origin: EP1698254A1] The furniture has an arm rest (19) supported about a swivellable axis which is horizontally and parallelly directed to a backrest (17). A locking mechanism is integrated in the arm rest and is locked in swivelling positions. The lock is removed by actuation of pusher arranged under the arm rest, is raised in removed condition and is lowered to an off-swivellable position. The arm rest is locked in each position by releasing the pusher.
