Abstract (en)

[origin: EP1698464A1] Lacquering device comprises a dosing unit (8) positioned in side walls (11) having hinges (12, 13) which are connected to a coupling mechanism (14, 15). The coupling mechanism is connected to hinges (16, 17) fixed to the side on the printing couple frame (20) for removing the printed matter. A device (21) for turning the dosing unit on and off is arranged on the printing couple frame and is detachably coupled with the dosing unit. Preferred Features: The side walls have two hinges and a first connecting rod is hinged on the first hinge (12) on one end. An actuating device (18) is hinged on the side walls and on the printing couple frame.
