Abstract (en)

In a paper feed cassette (1) for a printer, a copier, a fax machine, or the like, having a first housing (2), to elevate the loadable quantity of paper, it is suggested that a second housing (3) for receiving sheets be positioned in the first housing (2), the second housing (3) being mounted so it is movable in the first housing (2), and a blocking device (4) be provided for a motion direction of the second housing (3) in relation to the first housing (2).
