Abstract (en)

A reinforcing cord (10) for rubber reinforcement of the present invention includes reinforcing fibers. The reinforcing fibers include polyarylate fibers (11) and a plurality of outer strands (12) that are arranged around the polyarylate fibers (11). The plurality of outer strands (12) include fibers other than polyarylate fibers. The use of this reinforcing cord for rubber reinforcement makes it possible to obtain a reinforcing cord for rubber reinforcement having high strength, elasticity, and bending fatigue resistance, and a rubber product including the same.
