Abstract (en)

[origin: EP1699012A2] The method involves integrating a film file (SWF) into a banner, where the film file is divided into a static section (STAT) and a dynamic section (DYN). The film file is transferred to a user-end device. The film file is played by a play-back program on the user-end device and indicated on an indicating device such that the dynamic section is repeatedly played until criterion is fulfilled for starting the static section. Independent claims are also included for the following: (1) a banner with a film file (2) a system for executing a method for producing and displaying a banner.
