Abstract (en)
It is an object to provide the player with an incentive to play the game repeatedly by varying an effect display mode since the effect display mode to notify the information relating to the game can be selected at the player's choice such that the player's taste and wish may be reflected on the mode. A gaming machine 1 comprises: display means 4 for displaying a circumferentially-arranged image; reading means 19 for reading identification information from a game article storing the identification information; change means for conducting array change of symbols in the circumferentially-arranged image as the identification is read by the reading means; and display means for causing the display means 4 to display a changed circumferentially-arranged image after the array change is conducted by the change means.
