Abstract (en)

[origin: EP1699113A2] The connector has a contact partner fixed into a housing. The partner is arranged at an end of an electrical conductor (4), and is in electrical contact with the conductors. The housing is surrounded with an injection molding material (5) in a position, at which the conductor is guided into the housing. A fixing unit (7) is fixable together to the conductor in a given position, and is surrounded partly or completely with the material.
