Abstract (en)

[origin: WO2005115298A1] A medical treatment system is provided for the treatment of weakened bone structures caused by fractures, osteoporosis, or other bone related ailments using a dynamic motion plate (101). The medical treatment system utilizes a harness (202) and lifting system (105) to assist in supporting the weight of patients who are unable to remain in an upright posture on the dynamic motion plate for the duration of a treatment cycle.
