Abstract (en)

[origin: WO2005063451A1] The invention relates to a switch assembly for electric tools, comprising at least a first switch mechanism (29) provided with at least a first (30) and a second manually operable control member (30, 36, 37) for at least switching on and off the first switch mechanism (29), and provided with a locking means (33, 35) which is adapted to lock the first switch mechanism (29) in a switched-on mode, wherein the switched-on mode can be deactivated with the first and the second control member (36, 37).
