Abstract (en)
[origin: FR2864081A1] Synthesis of cycloalkylhydrazines and exocyclic heterocycloalkylhydrazines (A). Synthesis of cycloalkylhydrazines and exocyclic heterocycloalkylhydrazines (A) comprises: (a) reacting, in alkaline medium at 30-60[deg]C, a heterocyclic amine (B) with a monochloroamine (C); (b) separating the resulting solution into organic and aqueous phases by adding sodium hydroxide, with cooling such that the temperature does not exceed the boiling points of the compounds; and (c) optionally isolating (A) by distillation of the organic phase.
