Abstract (en)

[origin: WO2005064548A2] The invention relates to a method for identifying banknotes which are deposited by means of an automatic counter and are suspected to be counterfeit and/or counterfeit consisting in controlling depositable banknotes with respect to the authenticity thereof by a sensor device. The inventive method consists in combining data of said sensor device for suspected and/or counterfeit banknotes with a depositor identity, recording data of the suspected and/or counterfeit banknotes and the depositor identity data, producing inspection data for the suspected and/or counterfeit banknotes by means of the sensor device, thereby providing inspection data for one or several layers of banknotes which can be suspected or counterfeit, comparing inspection data with recorded data of suspected and/or counterfeit banknotes in order to control the strict conformity of the suspected and/or counterfeit banknotes to respective inspection data and in identifying the respective suspected and/or counterfeit banknotes by means of the depositor identity which is linked to the data of suspected and/or counterfeit banknotes in a strictly corresponding manner.
